

Certichex32 **Lite**

Laser Checkwriting Software

- Streamline Your Payment Process
- Compatible With Most Accounting Systems
- Multiple Security Features
- Very Affordable

Certichex32 **Lite** is the newest addition to our Laser Checkwriting Software product line. It is an affordable solution with professional features that was created to meet the checkwriting needs of small to mid size business. It gives them the ability to print two kinds of checks in house such as their own A/P, and Payroll Checks. Certichex32 **Lite** comes standard with the Automation feature, making it a perfect solution for Financial Institutions who want to print their own Cashier Checks, and Money Orders. Certichex32 **Lite** offers clients a cost effective laser checkwriting solution that enables them to quickly adopt secure in-house checkwriting.

CERTICHEX32 **Lite** streamlines your payment process and leaves the hassles of conventional checkwriting in the past. The many features of Certichex32 **Lite** allow you to increase productivity while maintaining multilevel security. By utilizing a MICR laser printer and our Windows®-based software, you will significantly reduce the time required to process checks while reducing check costs by 5 to 15 cents per check. Printing checks from blank safety paper enhances security and reduces inventory. Changes to company name, address, phone, or bank information are done easily and securely. All this is accomplished without changes to your existing accounting system.

IMPROVE EFFICIENCY AND CONTROL COST

- Design and personalize custom checks using company and bank logos
- Edit and change information easily
- Print unlimited voucher detail information
- Increase productivity
- Print bank information, MICR line, protected amount, and signatures in one process
- Eliminate hand feeding, decollating, signing, and bursting continuous form checks
- Automation comes included as a standard feature
- Eliminate the cost of preprinting institution and bank information
- Waste less paper by printing voucher details on regular laser paper

MULTILEVEL SECURITY:

- Print checks on readily available standard or customized safety paper
- Eliminate the need to physically secure blank checks and authorized signatures
- Access software program with authorized user password USB key
- Establish dollar amount thresholds on checks
- Encrypted Signatures

BROAD COMPATIBILITY:

- Utilizes Windows®-based software technology and MICR printing
- Can be configured for most MICR laser printers
- Has the ability to print to one MICR laser printer
- Compatible with most accounting programs
- Supports multi-currency and international check formats
- Recommended operating systems: Windows® 2000, XP, and NT

Upgrade to Certichex32

If you want to add on more features in the future, you can always upgrade to Certichex32, our full-featured system while only having to pay the difference in cost between the two systems.
