- Multifeeding - Allows for a set number of pieces to be pulled from one feeder, then collated and inserted automatically
- Folding only without inserting
- Daily post mode for inserting stapled sets

Options:

- OMR - Optical Mark Recognition (Available Soon)
- Cabinet
- Sheet Feeder for all FD 601 Models
- FD400 Jogger

The Office Folder/Inserter

Sleek and compact, the 600 Series Folder/Inserters are ideal for the office environment. A modular design with one to four feeders gives the 600 Series the flexibility to process virtually any office mailing. A centrally located control panel and easy to follow step by step instructions gives the 600 Series the ease of operation you expect and need for the office environment. Up to twenty jobs can be pre-programmed and named allowing for one touch set-up for reoccurring or frequent mailings. With the 600 Series the tedious task of folding and inserting is made easy, making more time for other valuable tasks.

Six Models Available:

FD 601-Basic	1 sheet feeder
FD 601-Advanced	1 sheet feeder and 1 insert feeder
FD 601-Xpert	1 sheet feeder and 2 insert feeders
FD 602-Basic	2 sheet feeders
FD 602-Advanced	2 sheet feeders and 1 insert feeder
FD 602-Xpert	2 sheet feeders and 2 insert feeders

LOCAL DEALER:

Flexible

The 600 Series is available in six models that can be tailored for virtually any office mailing. A variety of documents up to 14", including checks, invoices, newsletters and business reply envelopes can be inserted in one pass.

The daily mail feature allows for various mailings to be processed in stapled and non-stapled sets.

Powerful

The 600 Series processes at a rate of up to 2,200 pieces per hour and can handle up to 250 sheets in each feeder. Feeders can be refilled on the fly allowing for continuous operation.

The cascade mode maximizes production by filling multiple feeders with the same documents. Link two sheet feeders or two insert feeders, when one feeder empties the other one automatically starts feeding, this allows for a total stacking capacity of 500 sheets or inserts (350 when using BRE's).

Ease of Operation

A centrally located control panel with step by step instructions and pictographs enables operators to easily navigate their way through set-up and operation. Up to twenty pre-set jobs can be programmed and named for reoccurring or frequently processed applications. A drop-in feed system and easy-access paper path increases efficiency and maximizes output.

The QuickStart feature allows operators to begin using their main job with the push of a button.

Security

The 600 Series has double document detectors located at each feed station to insure document integrity.

Optional OMR capability allows for the insertion of multiple page documents automatically. OMR determines which documents go together into each envelope, eliminating the tedious task of manually collating and inserting (Available Soon).

Specifications

Speed:	2,200 pieces/hr
Feed Hoppers:	Up to 250 sheets
Paper Size:	Length 7" – 14" Width 5.5" – 8.5"
Envelope Size:	Length 3.5" – 6.375" Width 5.5" – 9.5"
Insert/BRE Size:	Length 5.5" – 8.9" Width 3.54" – 4.33"
Envelope Hopper:	Up to 250 envelopes
Dimensions:	21" W x 26" L x 22" H (FD 602-Xpert)
Weight:	123 lbs. (FD 602-Xpert)
Duty Cycle:	10,000 per month
Voltage:	100-120 Volts (50/60 Hz)
Safety Certifications:	UL

* All paper & envelope specifications may vary. All media must be tested.

User Friendly Control Panel

Insert or BRE Feeder

The FD 400 Jogger is a recommended option that reduces static electricity from forms and aligns them for proper feeding.
